

A young boy with short blonde hair and braces is smiling while looking at a brown smartphone. He is wearing a grey sweater over a maroon shirt. The background is a blurred indoor setting, possibly a living room with a couch and shelves.

TEXTING HAPPENS. 6 TYPES OF CANCER DON'T HAVE TO.

6 types of cancer can be prevented by the HPV vaccine.

Recommended vaccines for adolescents:

Tdap | HPV | Meningococcal | Hepatitis B
Chickenpox | Influenza

For more information, talk to your child's healthcare provider, local health department, or pharmacist.
